

CORPORATE ACTIVITIES

Integrated Energy Solutions for Indonesia and International Markets

RM Energy is an integrated energy company engaged in the development, sourcing, trading, distribution and delivery of natural gas, petroleum products and supporting energy infrastructure.

Our corporate activities connect reliable supply sources with industrial, commercial and strategic customers through disciplined commercial management, efficient logistics, strong quality assurance and uncompromising HSSE standards.

SAFE
Zero Harm Culture

RELIABLE
Operational Excellence

QUALITY
On-Spec, On-Time, Every Time

SUSTAINABLE
Responsible Energy for a Better Future

1 NATURAL GAS SUPPLY AND DISTRIBUTION

- Gas sourcing and supply
- Pipeline & non-pipeline distribution
- Gas allocation & coordination
- Receiving point management
- Long-term & spot agreements
- Coordination with transporters and infrastructure operators

2 COMPRESSED NATURAL GAS – CNG

- CNG sourcing & procurement
- Mother & daughter stations
- Compression & filling operations
- Transportation & fleet operations
- Virtual pipeline distribution
- Customer-site strategic delivery
- Supply for industry & power
- Fuel conversion support

3 LIQUEFIED NATURAL GAS – LNG

- LNG sourcing & trading
- Small-scale & commercial LNG supply
- LNG regasification & loading
- Storage & regasification solutions
- Reliable LNG solutions
- Supply for industry & power
- LNG terminals & infrastructure partnership

4 PETROLEUM PRODUCTS TRADING

- LPG, Naphtha, Gasoline
- Gasoil & Diesel
- Fuel Oil & Condensate
- Petrochemical Feedstocks
- Other Refined Products
- Due diligence & quality verification
- Specifications & documentation
- Supply chain coordination

5 LPG SUPPLY AND DISTRIBUTION

- International & domestic LPG sourcing
- Bulk LPG supply
- Cargo & terminal coordination
- Storage & handling
- Road-tanker transportation
- Industrial LPG distribution
- Quality verification
- Long-term & spot cargo

6 ENERGY TRADING AND COMMERCIAL OPERATIONS

- Physical energy trading
- Long-term supply agreements (SPA & off-take)
- Gas & fuel procurement
- Product supply to end-users
- Market & pricing analysis
- Commercial optimization
- Contract administration
- Delivery scheduling
- Quality coordination
- Relationship management

7 ENERGY LOGISTICS AND TRANSPORTATION

- CNG tube-trailer logistics
- LNG transportation coordination
- LPG & product distribution
- Road, sea and land trucking
- Warehouse & terminal coordination
- Loading & unloading management
- Route & journey planning
- Dangerous goods control
- Product tracking & monitoring
- Cross-border trade coordination
- Emergency response coordination

8 STORAGE, TERMINAL AND DISTRIBUTION INFRASTRUCTURE

- Gas receiving & distribution stations
- CNG mother & daughter stations
- LNG regasification facilities
- LPG storage & filling facilities
- Product storage terminals
- Tank farms
- Loading & unloading facilities
- Metering & pressure regulation
- Pipeline interconnection
- Industrial receiving stations
- Port & marine infrastructure

9 COMMERCIAL GAS INFRASTRUCTURE DEVELOPMENT

- Market demand assessment
- Feasibility studies
- Site & route evaluation
- Project design
- Engineering & permit coordination
- Permit & stakeholder management
- Construction & commissioning support
- Operations & maintenance planning
- Asset management

10 INDUSTRIAL FUEL CONVERSION

- Fuel consumption assessment
- Energy & cost comparison
- LNG / CNG usage evaluation
- Natural gas burner replacement
- Boiler & furnace assessment
- Infrastructure planning
- Safety & technical review
- Conversion project coordination
- Post-conversion monitoring

11 ENGINEERING AND TECHNICAL COORDINATION

- Conceptual & FEED support
- Equipment selection
- Pipeline & process design
- Compression & regasification systems
- Instrumentation & control
- CNG & gas detection systems
- Area classification support
- Maintenance & asset integrity

12 QUALITY ASSURANCE AND PRODUCT CONTROL

- Specification verification
- Sampling & laboratory testing
- Tank & line cleanliness
- Product quality control
- Quantity & custody control
- Calibration & measurement
- Contamination prevention
- Nonconforming product control
- Claims & discrepancy management

13 HSSE AND OPERATIONAL COMPLIANCE

- Life-saving rules implementation
- Risk assessment & permit to work
- Safe operations & procedures
- Incident & near-miss reporting
- Emergency preparedness
- Environmental protection
- Contractor HSSE management
- Continuous improvement

14 REGULATORY AND CORPORATE COMPLIANCE

- Legal & permit compliance
- Customary & due diligence
- Anti-bribery & corruption
- Sanctions & trade compliance
- Export-import documentation
- Records & data integrity
- Confidential information protection
- Ethical business & reporting

15 STRATEGIC PARTNERSHIPS AND JOINT VENTURES

- Energy producers
- Infrastructure operators
- Terminals & storage companies
- Logistics & shipping companies
- Engineering & technology providers
- Investment & financial institutions
- Government & strategic partners
- Industrial & commercial customers

16 ENERGY TRANSITION AND LOWER-EMISSION SOLUTIONS

- Natural gas as transition fuel
- CNG & LNG for lower emissions
- Biomethane & renewable gas
- Hydrogen-ready infrastructure
- Carbon management technologies
- Methane emission reduction
- Energy efficiency solutions
- Digital monitoring & optimization
- Sustainable infrastructure development

OUR INTEGRATED VALUE CHAIN

INDUSTRIES WE SERVE

WHY WORK WITH RM ENERGY

- ✓ Integrated capability across the entire energy value chain
- ✓ Flexible supply solutions: Pipeline, CNG, LNG, LPG and petroleum products
- ✓ Commercial discipline with transparent governance
- ✓ Strong quality assurance and product integrity
- ✓ Safety leadership with world-class HSSE standards
- ✓ Strategic partnerships and global energy network
- ✓ Long-term partnership and sustainable value

RM ENERGY is committed to delivering dependable energy through responsible sourcing, operational excellence and a sustainable approach for a better future.
